Astroshop quarterly SLO report — Q3 2026

Attainment against SLO for every service, with error-budget burn. The table runs onto a second page; note that the continued rows carry no repeated header.

Service	Tier	SLO target	Q3 attainment	Budget burned	Worst incident
accounting	2	99%	99.7%	18%	none
ad	1	99%	99.94%	35%	adFailure
astronomy-db	1	99.9%	99.94%	35%	none
cart	0	99.9%	99.87%	62%	cartFailure
checkout	0	99.5%	99.87%	62%	none
currency	1	99.95%	99.94%	35%	none
email	2	99%	99.7%	18%	emailMemoryLeak
flagd	1	99.95%	99.94%	35%	none
fraud-detection	2	99%	99.7%	18%	none
frontend	0	99.9%	99.87%	62%	imageSlowLoad
frontend-proxy	0	99.95%	99.87%	62%	none
image-provider	1	99.9%	99.94%	35%	none
kafka	1	99.9%	99.94%	35%	kafkaQueueProblems
otel-collector	1	99.95%	99.94%	35%	none
payment	0	99.9%	99.87%	62%	paymentFailure
product-catalog	0	99.9%	99.87%	62%	productCatalogFailure
quote	1	99.5%	99.94%	35%	none
recommendation	1	99%	99.94%	35%	recommendationCacheFailure
shipping	1	99.5%	99.94%	35%	intlShippingSlowdown
valkey-cart	1	99.95%	99.94%	35%	none

Interpretation: tier-0 burned 62% of its 28-day budget this quarter, driven mostly by the payment and product-catalog incidents. Tier-2 attainment looks low but has no customer impact — it is ledger and fraud-scoring freshness, which recovered fully each time.
